

This was my first attempt at font making, so it might be a bit rough around the edges. Hanoded is a nice font nonetheless and I hope you will enjoy using it.

About the use of this font: it is absolutely 100% free for all. That includes commercial use and the like.

If you really like it, I'd appreciate some feedback. Drop me a line at

Thanks!

ps: this is version number 3; i fixed some bugs, like the space bar (it works now!)...
